Participants Wanted for MRI Research Study

You are invited to participate in a LANGUAGE STUDY using BRAIN IMAGING (functional MRI).

To be eligible:
- Age 18-45
- Right-handed
- Native speaker of English
- No psychiatric / neurological history (such as concussion)
- No history of disorders or delays in language / reading
- No hearing/vision disorders
- No metal in your body

Participation involves:
- Questionnaires
- MRI tasks
- Approximately 1.5-2 hours.

Compensation:
- $12/hour, rounded up to the nearest 15-minute increment
- A picture of your brain (if you would like one)

Experiments take place at BIRC, the UConn Brain Imaging Research Center at Storrs

There is no direct benefit to you personally from participating in this study, but an indirect benefit is that you will be contributing to scientific research into the human capacity for language. Such research may eventually lead to societal benefits, such as improved treatments for language disorders in children and adults.

For more information:
- Email UConnBrain@gmail.com
- Include a daytime phone number. A member of our research team will contact you to discuss the study.

This study is directed by William Snyder, Ph.D., Professor of Linguistics, University of Connecticut.

UConn IRB Protocol H20-0122 Approved December 17, 2020
